

MANAGED XDR

XDR provides the security essentials you need to stay ahead of emerging threats.

Defy Your Attackers™ With Ruthless Efficiency

XDR has become a must-have for organizations of all sizes to defend against the ever-growing threat of ransomware.

XDR doesn't just offer a defense; it provides a comprehensive shield, intelligently identifying and neutralizing common attack vectors. Traditional solutions often leave businesses juggling multiple vendors and spiraling costs, but XDR offers simplicity and efficiency in one package.

It's designed to cut through the noise, reducing alert fatigue by filtering out false positives, so your team can concentrate on genuine threats. This is not just a nice-to-have upgrade; it's a critical foundation for any SMB's security posture, addressing the unique challenges faced by smaller organizations with limited in-house expertise. Investing in XDR is an investment in your business's future, ensuring you stay one step ahead of cyber threats.

With XDR, you're not just managing risks—you're transforming them into a manageable and secure environment, making it an indispensable part of any SMB's cybersecurity strategy.

If you need a proven cybersecurity partner then you can trust PurpleSec. They identified suspicious activity on our network and stopped a ransomware attempt in real-time. If not for their intervention, the attackers would have had access to source code and client information.

Steven M.
SVP IT, Technology Startup

KEY BENEFITS

Fully Managed:

A cloud-native platform managed by security experts, integrating with popular business applications to provide comprehensive visibility across modern environments.

Automated Response:

Actively responding to threats to reduce resource costs.

Consolidate Vendors:

Reduce your tool complexity and costs from 6 vendors to 1.

Intel & Analytics:

Machine Learning & community intelligence come together to analyze the events and give them intelligent context.

XDR Tuning:

Our experts customize security to your needs, helping to further filter out noise and focus on security outcomes.

Cybersecurity Framework:

Our Security Configuration Assessment immediately maps your cyber controls to popular frameworks.

Defiance XDR™ Capabilities

Endpoint Security

- **Ransomware Defense** – Quickly detect and actively respond to ransomware.
- **Vulnerability Defense** – Enterprise-grade scanner and known exploitation prevention.
- **Virus Defense** – Intelligence from VirusTotal and active removal of threats.
- **File integrity Monitoring** – Know when your critical data and files are accessed or altered.
- **Security Configuration Assessment** – Continuous and on-demand system auditing.

Infrastructure Security

- **Managed Detection And Response** – Cover your incident response requirements.
- **Continuous Threat Detection** – Constant vigilance against known threats.
- **Automated Response** – Cut down on alerts and take action against threats.
- **Regulatory Compliance** – The tools you need to track your journey and conduct audits.

Cloud Security

- **Container Security** – Seamlessly integrate with the cloud for more visibility.
- **Posture Management** – Ensure your cloud infrastructure is properly defended.
- **Workload Protection** – Keep your code out of enemy hands and free of malware.
- **Platform Configuration Assessment** – Make sure your cloud is compliance-ready.
- **Email Protection Alerting** – Integrate your email protection to enhance XDR.

Human-Led Security

- **DoD Expertise** – Expert support to fine-tune our solution to optimize your security processes and posture.
- **Program Management** – We work as an extension of your team and partner with you to manage your security.
- **Virtual CISO** – A single point of contact that oversees and directs your cybersecurity program.

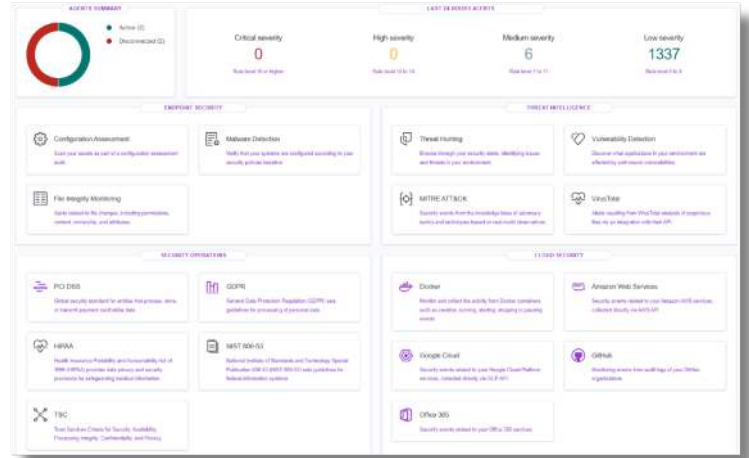

Defiance XDR™ Features

XDR Dashboard

The Defiance XDR dashboard acts as a command center for security teams.

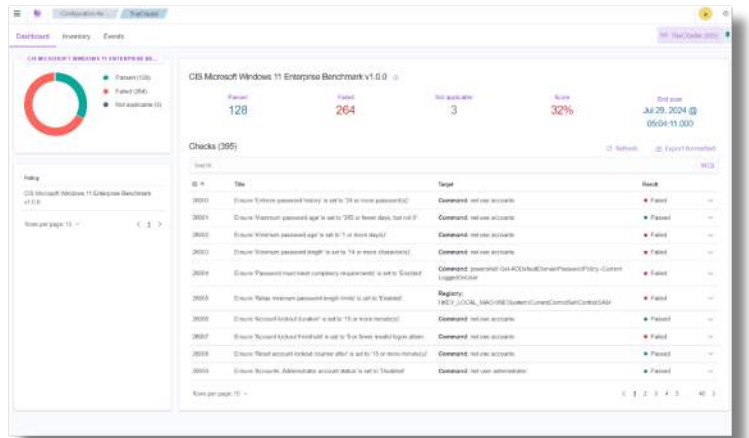

- Quickly visualize security posture.
- Dashboards for product features.
- Create customized views and dashboards.

Framework & Compliance Mapping

Automatically map your technical controls to popular frameworks.

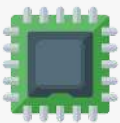

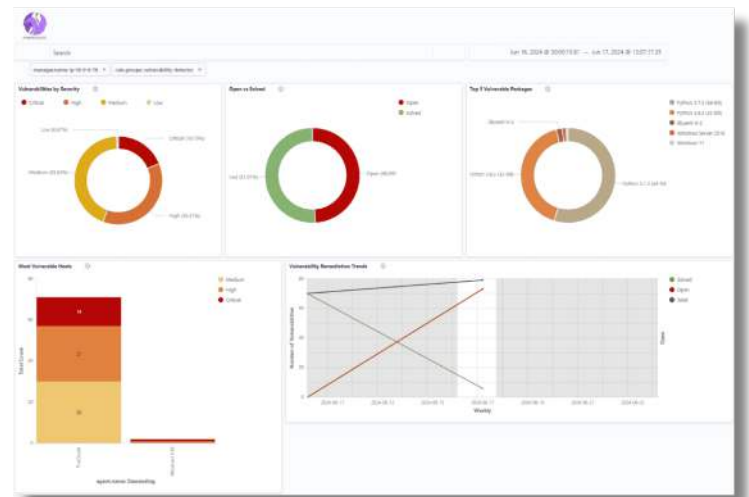

- Keep track of your compliance.
- On-Demand scoring.
- Easier Auditing.

Reporting Capabilities

On-demand customized reports to show only what you need.

- Easy to set up.
- Customized Schedules.
- Whitelabel branding.

<1% of CPU & 20MB of RAM

No impact on system performance.

Deploy in <10 minutes

Quick and easy install delivering immediate value.

Zero Disruptions

Silent installation with no interference, conflict or end user visibility.

Why Choose Defiance XDR™?

Choosing Defiance XDR means choosing a partner committed to your success

Our comprehensive, fully managed, and intelligent approach to cybersecurity ensures that your business is protected against the ever-evolving landscape of digital threats. With Defiance XDR, you're not just securing your business; you're securing your future.

Fully Managed

At PurpleSec, we understand that managing cybersecurity can be overwhelming. That's why our solution is fully managed, allowing you to focus on what matters most—your business. With our expert team handling the complexities, you can rest easy knowing that your security is in capable hands.

Cost-Effective

We know that budget constraints are a significant concern for SMBs. Defiance XDR offers a cost-effective solution that provides holistic security without the premium price tag. We deliver exceptional value, ensuring your business is protected without breaking the bank.

Reliable

With Defiance XDR, you can trust that your security infrastructure is robust and resilient. We offer continuous monitoring and support, ensuring that your defenses are always up and running when you need them most.

Proactive

We don't just wait for threats to occur; we anticipate them. By continuously monitoring your systems and identifying potential vulnerabilities, we prevent attacks as they happen, keeping you and your team focused on growing your business.

Compatible

Seamlessly integrate with your existing infrastructure, offering compatibility with a wide range of systems and applications. This flexibility ensures that our solution can adapt to your unique business environment, providing a tailored security experience that meets your specific needs.

ABOUT PURPLESEC

Founded in 2019, PurpleSec is a veteran-owned cybersecurity firm with a mission to help small and mid-sized businesses affordably meet their security requirements. The company's leadership and staff bring extensive experience from the U.S. Cyber Command, Department of Defense, special operations units, and private industry.

PurpleSec's team comprises highly certified professionals holding top industry certifications such as CISSP, CRISC, GCED, OSCP, CISA, CISM, MCSE, CCNA, GPEN, and GWAPT. With decades of combined expertise across domains like cyber warfare, healthcare IT, finance, insurance, and government cybersecurity, we apply best-of-breed practices to commercial clients.

PurpleSec is dedicated to delivering customized, cost-effective cybersecurity solutions. Our core values center around partnering with clients, providing transparency, and maximizing value.
