

PENETRATION TESTING SERVICES

We use MITRE's ATT&CK framework and OWASP top 10 to test resilience against the latest attacks and APT techniques.

Assess Your Security And Discover Your True Risk

Our approach involves simulating real-world attacks to uncover weaknesses before malicious actors can exploit them.

Our team of certified U.S.-based experts tailors each assessment to your unique business needs, offering a comprehensive suite of services including internal and external network testing, web application assessments, social engineering simulations, wireless network evaluations, and red team exercises.

When you choose PurpleSec, you're partnering with a team that brings **deep expertise and experience in helping SMBs and Startups** achieve their penetration testing goals on budget.

Our experts provide point-in-time assessments of:

KEY BENEFITS

Increase Security ROI:

Rather than relying on guesswork, you can prioritize security spending based on actual risks, focusing resources on your most critical assets and vulnerabilities.

Prove Security Investments:

How do you know if your cybersecurity is working if you haven't tested it? A penetration test uncovers the gaps in tools or policies to improve security.

Gain A Competitive Edge:

Clients and vendors are investing in 3rd party security, which requires some organizations they do business with to perform a pen test.

Improve Incident Response:

By testing your team's ability to detect and respond to attacks, we help you identify gaps in your security processes, building resilience to minimize downtime and losses in case of a real incident.

Why PurpleSec

At PurpleSec, our offensive security experts will establish a framework to proactively identify and classify vulnerabilities in applications or an IT infrastructure to reduce risk.

- **Unparalleled Expertise** - Our team holds industry-leading certifications (OSCP, OSWE, OSWP, OSCE) ensuring world-class assessments.
- **Rapid Results** - Get actionable insights within 4 weeks of engagement, with immediate alerts on critical vulnerabilities.
- **Business-Focused Reporting** - Receive clear, jargon-free reports that speak to both technical teams and C-suite executives.
- **Dedicated Support** - Work with a single point of contact invested in your security goals from start to finish.

Our commitment to your business extends beyond the assessment. We promise minimal disruption to your operations, clear communication throughout the process, and actionable remediation guidance. We also include retesting to verify that identified issues have been resolved effectively; along with a letter of attestation.

Don't wait for a breach to expose your vulnerabilities. Take the next step in securing your business by **contacting PurpleSec today**. Our team is ready to offer a free consultation and create a custom quote tailored to your specific business needs.

With PurpleSec's penetration testing services, you're not just checking a box for compliance—you're making a strategic investment in your company's security, resilience, and long-term success.

ABOUT PURPLESEC

Founded in 2019, PurpleSec is a veteran-owned cybersecurity firm with a mission to help small and mid-sized businesses affordably meet their security requirements. The company's leadership and staff bring extensive experience from the U.S. Cyber Command, Department of Defense, special operations units, and private industry.

PurpleSec's team comprises highly certified professionals holding top industry certifications such as CISSP, CRISC, GCED, OSCP, CISA, CISM, MCSE, CCNA, GPEN, and GWAPT. With decades of combined expertise across domains like cyber warfare, healthcare IT, finance, insurance, and government cybersecurity, we apply best-of-breed practices to commercial clients.

PurpleSec is dedicated to delivering customized, cost-effective cybersecurity solutions. Our core values center around partnering with clients, providing transparency, and maximizing value.

We've partnered with PurpleSec to cover our clients' penetration testing needs and couldn't be happier! From proposal to service delivery, the PurpleSec team does a fantastic job at communicating and providing a high level of detail in their work.
